Product
V2000 Glass Louvre Systems (GLS-M) were specified for this prestigious Recreation and Aquatic Centre on the South Coast of NSW. This system conceals all motor and drive components inside its extruded frame and is able to accommodate glass louvres up to 600mm wide. Ideally suited for angled heads and sills or those difficult window and door openings where other products fail. When integrated with our range of glazing systems, it provides a seamless glazing solution.
