Product

Vollay V6000 Automation and Control Systems are capable of controlling the motorised Vollay Systems through your building's automation system. Whether it be solar tracking systems which control multiple motors, sensors which detect lux levels, rain, wind, temperature and track time, we are able to provide a solution for any application. Using our in-house electricians, we are able to manufacture the control cabinet to suit any client's needs and support it with our software programs which can be fine tuned to suit the building's needs.
