Product

This pic shows a detail of the Vollay sliding panel positioned to suit the shading needs at the time. The apartment complex required weather and light control, especially to combat the harsh afternoon sun. The Vollay V9000 Motorised Aerofoil Louvre System using a 150mm blade was specified across the width of this large space for its ability to be able to slide the panels and adjust the blades anywhere on the horizontal plane. This flexibility and clever use of space was also a major factor in the specification at the design stage. Precious Steel Pearl powder coat to AS3715-2002 at 60-80microns.
