Private Residence

Location

Bronte, NSW

Product

The V9000 Aluminium Louvre Systems – ALS-M 300, was fitted to these windows, which required a custom solution using 300mm blades to fit between copper cladding. The motor and drive system were concealed in the bottom frame and concealed pivot were used on the top to make the blade look like it floats. This allows the blade to be opened and closed with a push of the button.
