Product

The V9000 Motorised Aerofoil Louvre System using a 200mm blade was specified across the width of this large office building to minimise the impact of the hot sun on the glass thereby reducing air conditioning costs inside the building. This photo highlights the clean lines with all motors housed and hidden inside the box section. Also shown is the attachment of a night light. Anodised surface finishing to AS1231-2000 at 22microns.
